

# NEDCON Pallet Racks

**Making pallet racks is what we do. And we do it well. NEDCON designs, tests and manufactures precision-made and customised products in-house.**

Our engineers love it when you present them with a challenge. Additional load bearing capacity, custom work? Give us a try.

We make racks that perfectly suit your storage requirements. We understand that the safety of your employees and the continuity of your logistic processes are crucially important here. Our racks are known for their reliability and satisfy the requirements of the European EN standard series for pallet racks.

## Advantages of NEDCON pallet racks

- Precisely customised to provide maximum storage capacity
- Leader in safety and durability
- Flexible and modular structure
- Wide range of accessories
- Suitable for manual and automated warehouses
- Future-proof with high residual value

If it can be done,  
consider it done

### Modular and robust

Thanks to the modular setup, you can easily extend your system or combine it with mezzanine floors, flow racks, (long-span) shelving systems, or flow racks. You can always order additional custom made racks and components. And because the racks are extremely strong and stay in good condition, they have a high residual value. Even after extensive use.

Do you use popular pallets like Chep, Euro or Block? Our Smart Range products are reasonably priced and ready to ship within 72 hours.
